(a) interface and strip, $A = 0.3$, $\rho_m = A$
$x_2$
$x_1$
$t = 0.25$
initial interface $z_0$
part of $z_0$ where $\sigma_0 \geq 0$
central curve $z_0 + tU_0 n_0$
strip for $\kappa = 0.8\,\kappa_{max}$ (first order in $t$)
(b) single-strip bounds, $\rho_m = A$
$\sigma_0 \geq 0$
upper bound for $\kappa(\alpha)$
$\alpha$
$\kappa_{max}$ (optimal tilt $\delta_*$)
single layer of [LM26], exact hull (4.14)
bound stated in [LM26] ($\bar{c} < \frac{1}{2}$)
