(a) $d = 3$: spectrum in the λ-plane
spurious
(not converged in N)
−2
−0.54247
1 (gauge)
collocation $N = 60$
collocation $N = 120$
Wronskian (exact to 25 digits)
$\mathrm{Re}\,\lambda > -2$
Im λ
Re λ
(b) first stable eigenvalues vs. d
gauge mode $\lambda = 1$
$\lambda_1(d)$
$\lambda_2(d)$
λ
space dimension d
